HELLO PILOTS !

START NOW

MISS*NG MANUAL

MEET THE DRONE !!!

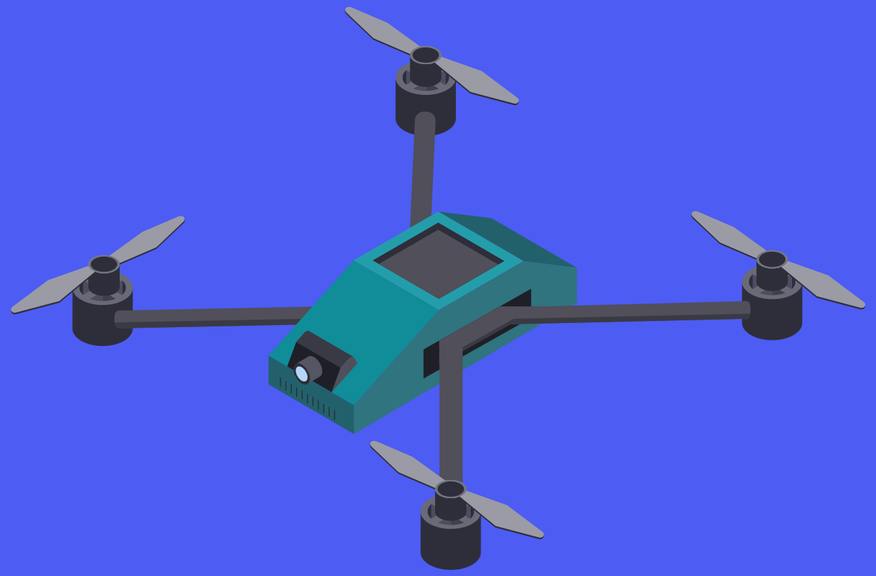

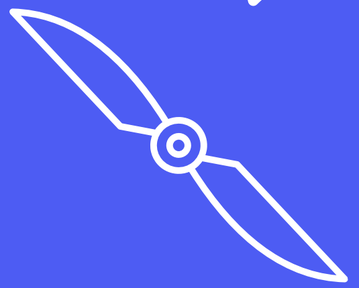

QUADCOPTER

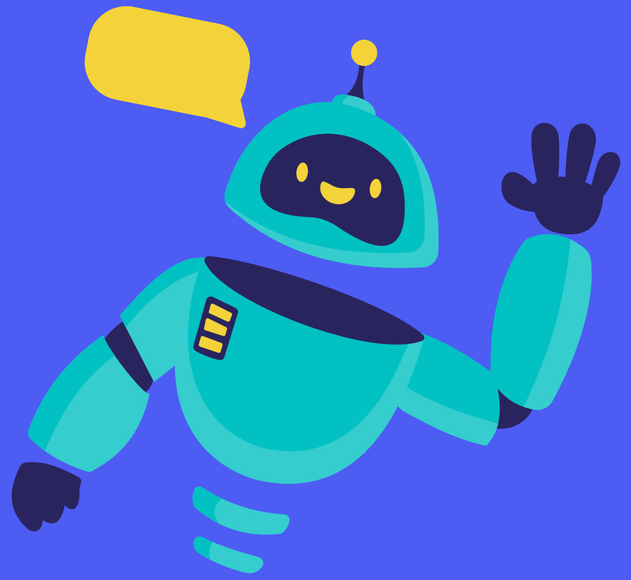

MISS*NG MANUAL

QUAD COPTER

4

All the parts come together to make flight possible !

MISS*NG MANUAL

PARTS OF DRONE

MISS*NG MANUAL

PROPELLERS

MISS*NG MANUAL

PROPELLERS – Propellers spin to move air.

They help the drone move and turn.

They help generate lift.

MISS*NG MANUAL

MOTORS

MISS*NG MANUAL

MOTORS - The Muscles

- Motors make the propellers spin.
- Motors use electrical energy.
- Motor speed can change during flight.

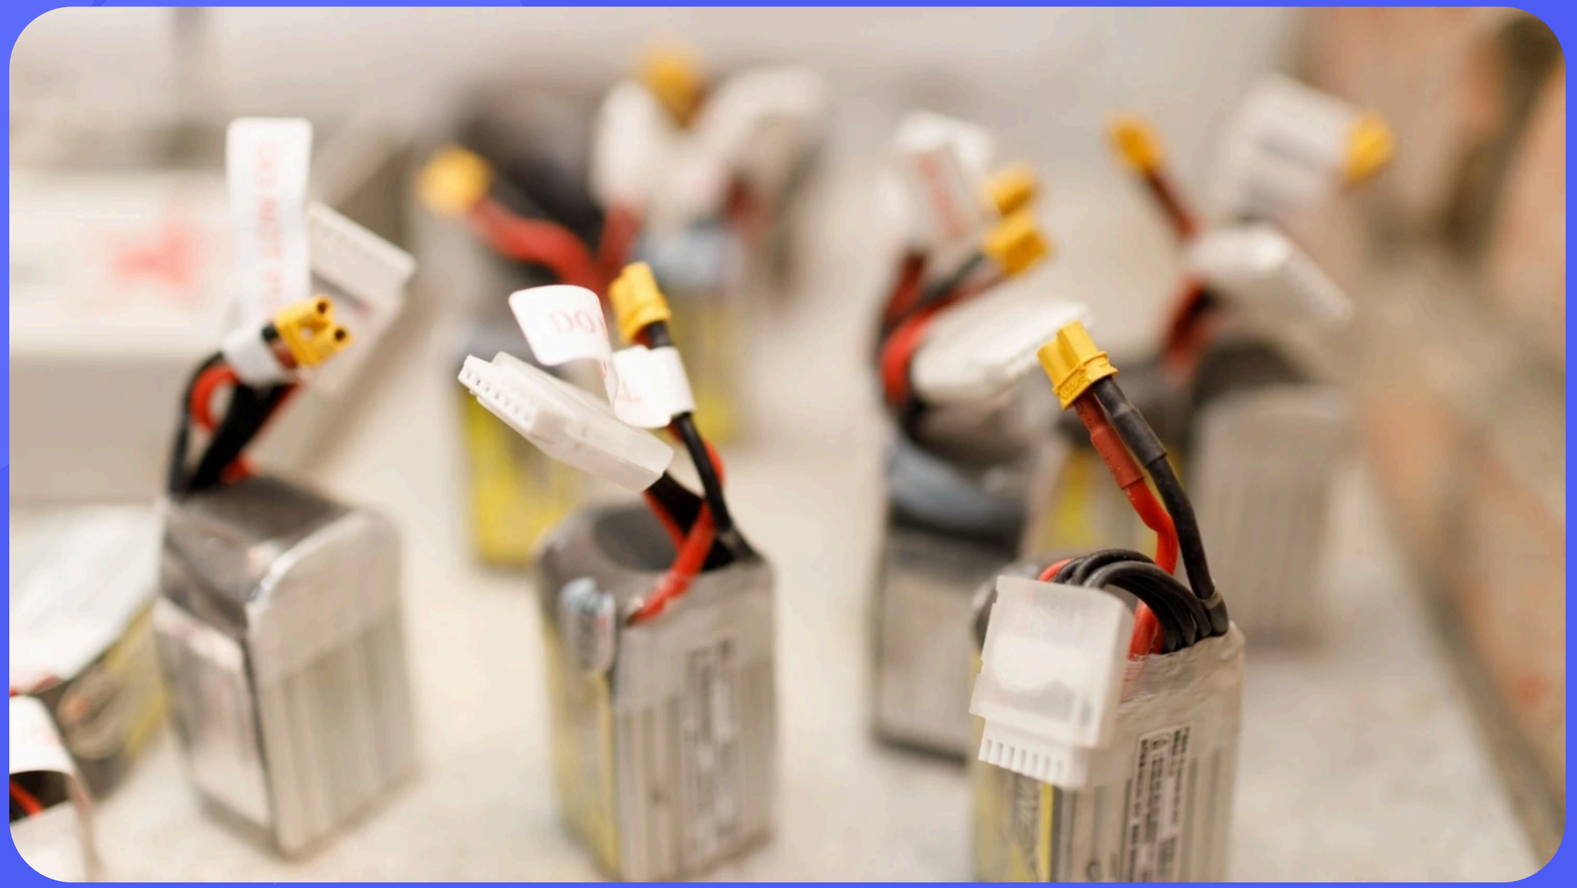

MISS*NG MANUAL

BATTERY

MISS*NG MANUAL

BATTERY – The Energy Source

- The battery stores electrical energy.
- It powers the motors and electronics.
- When the battery gets low, the pilot must plan a safe landing.

MISS*NG MANUAL

DRONE FRAME

MISS*NG MANUAL

DRONE FRAME

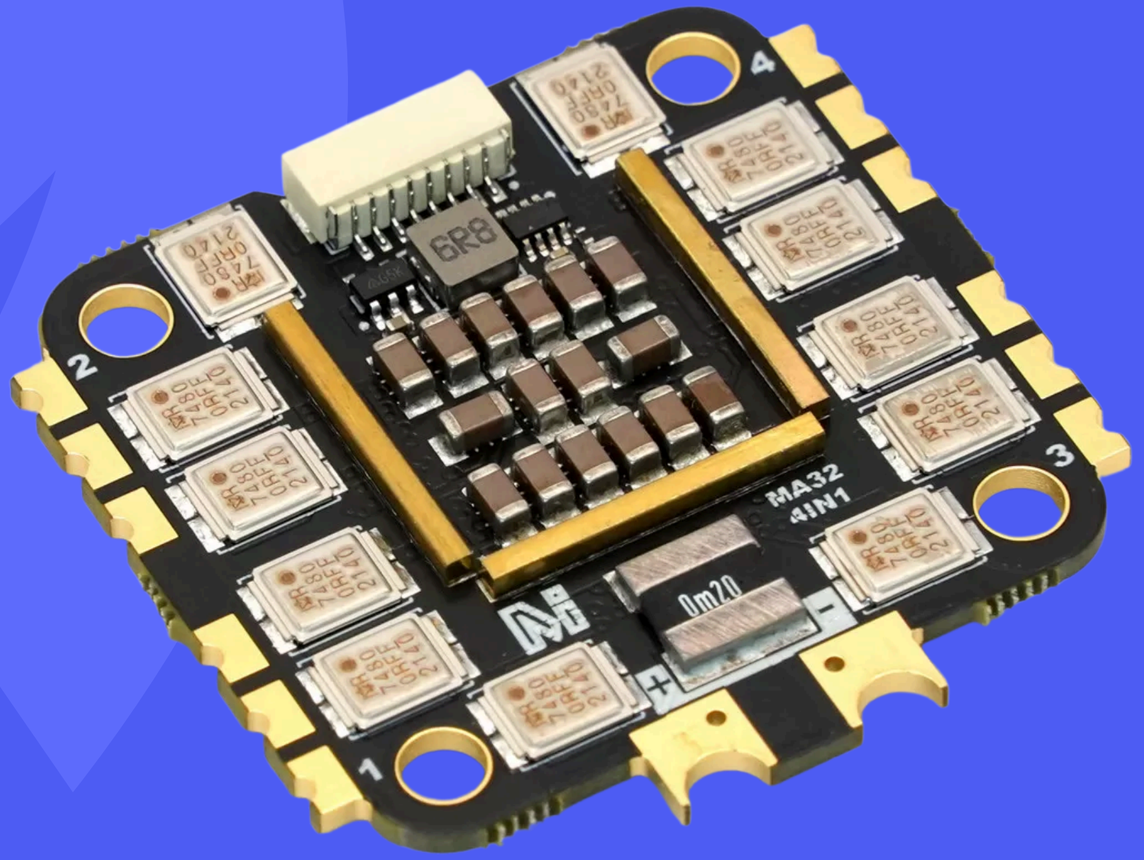

- Frame holds the components.
- Arms support the motors.

MISS*NG MANUAL

FLIGHT CONTROLLER

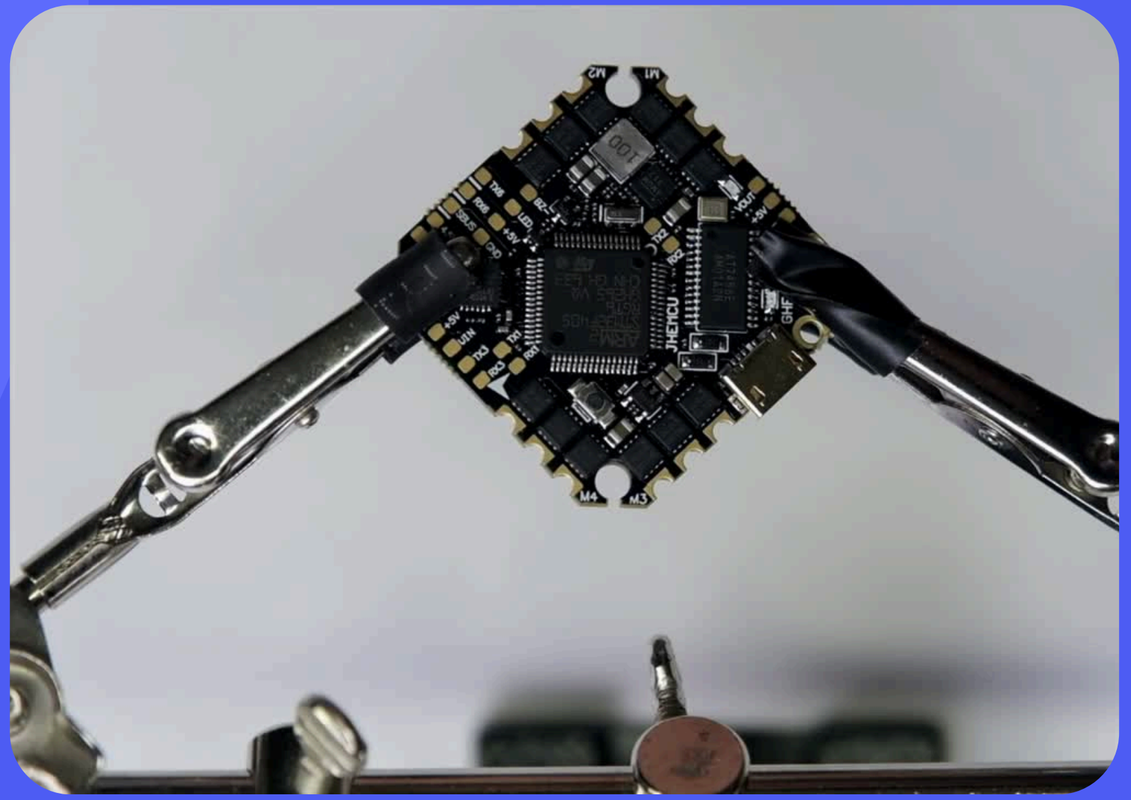

MISS*NG MANUAL

FLIGHT CONTROLLER - The Brain

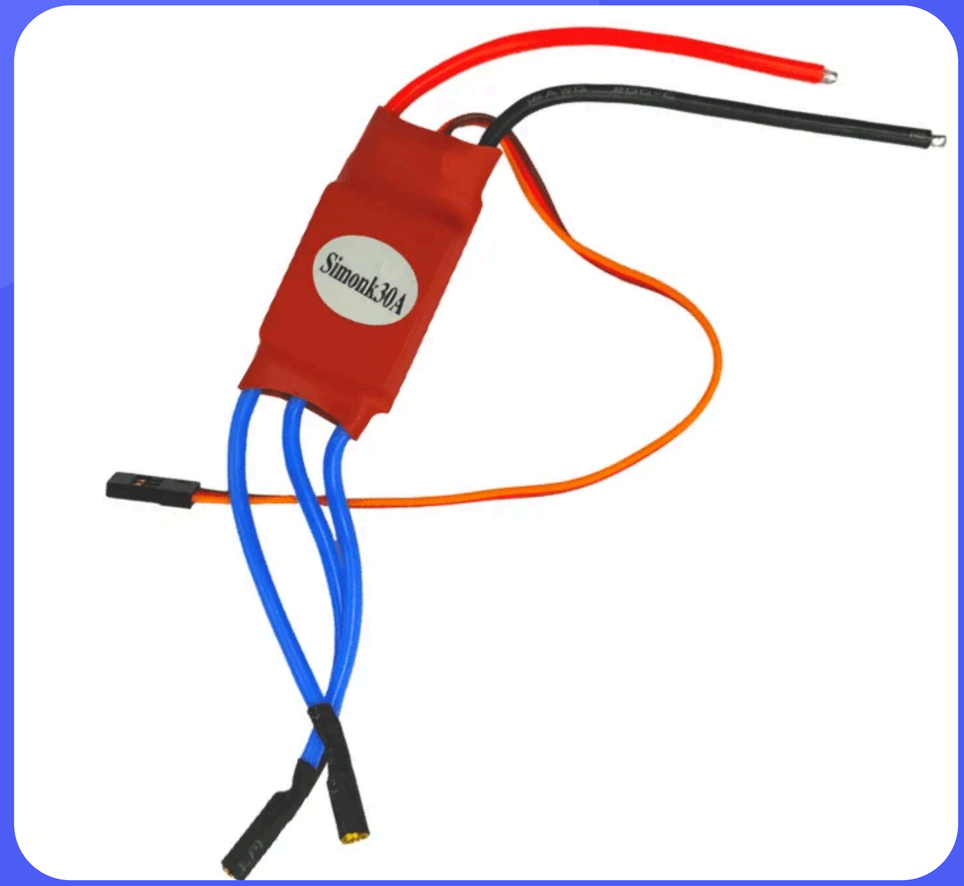

- Receives flight commands.
- Uses information from sensors.
- Adjusts motor speeds.
- Helps the drone stay balanced.

MISS*NG MANUAL

ELECTRONIC SPEED CONTROLLERS (ESC)

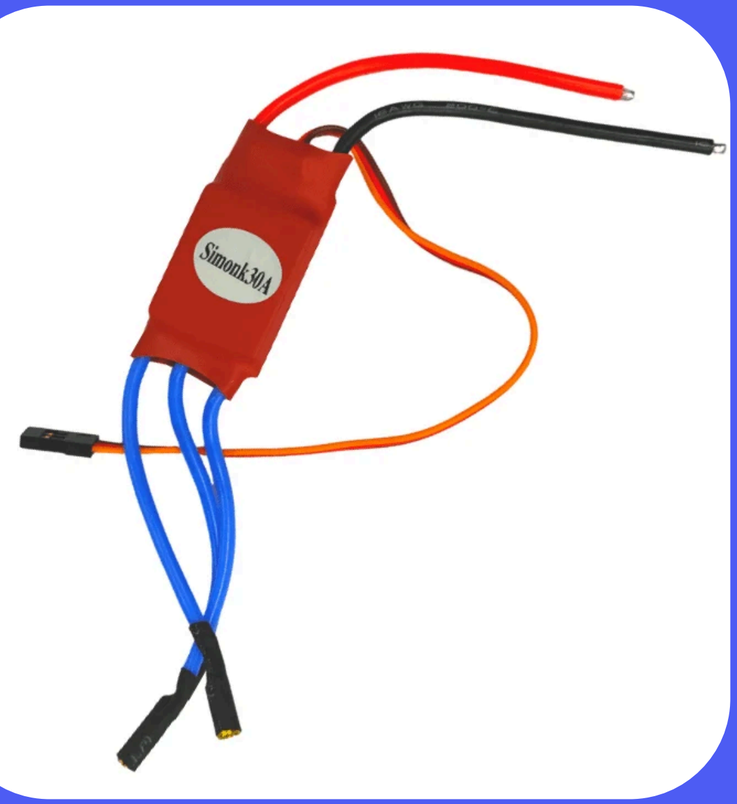

MISS*NG MANUAL

ESC – The Motor Manager

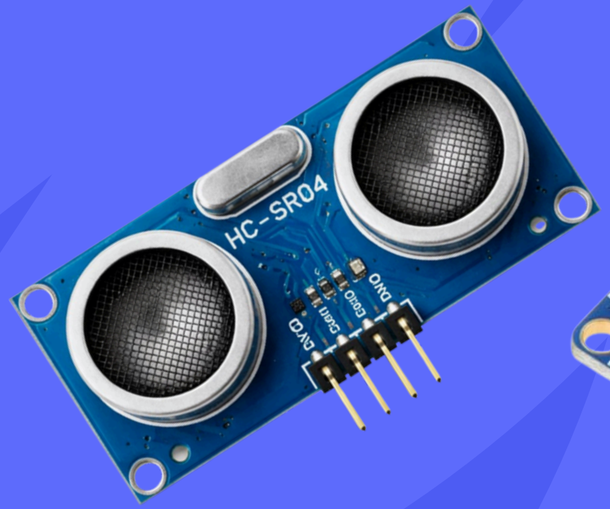

- ESC means Electronic Speed Controller.
- It controls the speed of a motor.
- It carries out motor-speed commands.

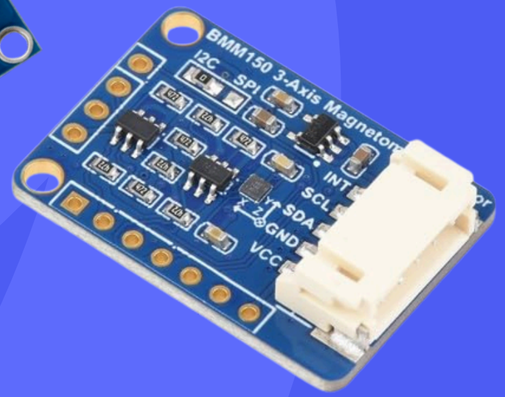

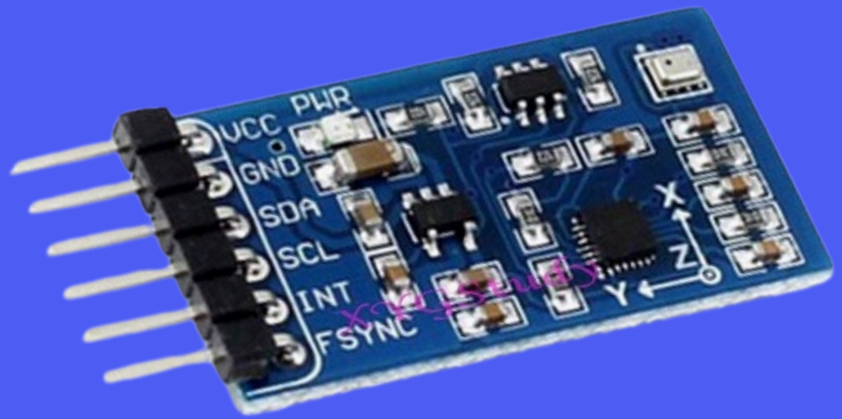

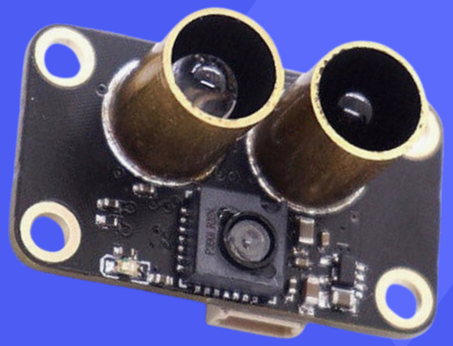

MISS*NG MANUAL

SENSORS

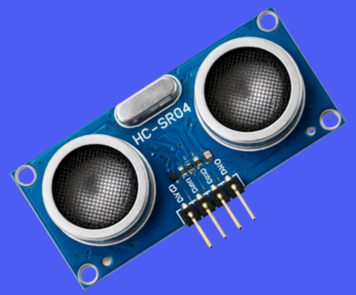

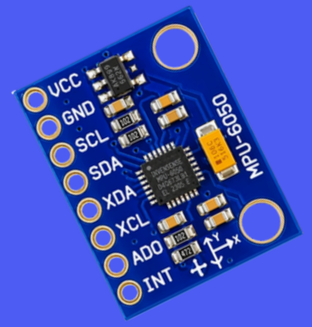

MISS*NG MANUAL

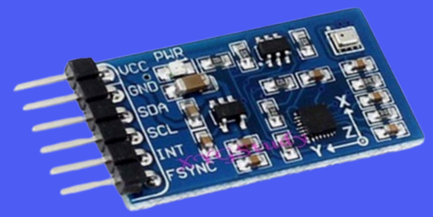

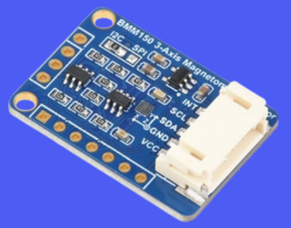

SENSORS – The Drone's Senses

- Sensors measure movement and tilt.
- Some help estimate height or position.
- Some drones have obstacle-detection sensors.

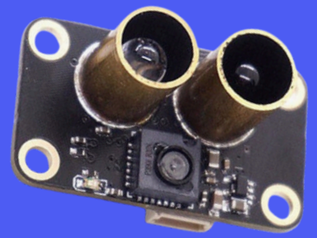

MISS*NG MANUAL

CAMERA

MISS*NG MANUAL

CAMERA – The Drone's Eyes

- Captures photos and videos.
- Helps with inspection and mapping.
- Not every drone has a camera.

MISS*NG MANUAL

COMMUNICATION SYSTEMS

MISS*NG MANUAL

COMMUNICATION SYSTEMS – How Drones Receive Commands

- Remote controllers
- Phones or tablets on supported models
- Computers and programming
- Wireless signals and antennas

MISS*NG MANUAL

LANDING GEAR

MISS*NG MANUAL

LANDING GEAR

- Landing gear helps with landing.
- Guards help protect propellers on
  Equipped models.

MISS*NG MANUAL

DROWN FAME

MISS*NG MANUAL

GUESS THE PARTS

MISS*NG MANUAL

I am the brain of the drone. I process data from sensors and make calculations to keep the drone stable.
Who am I?

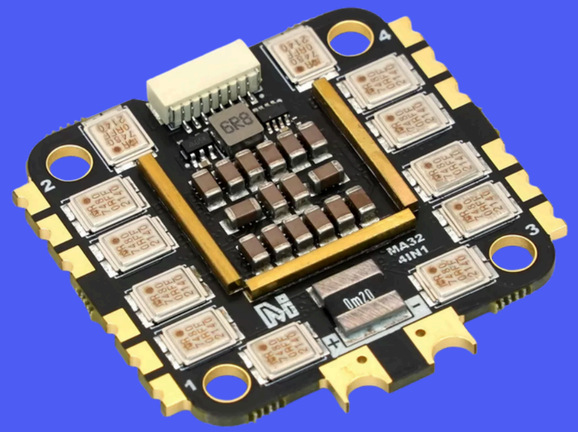

MISS*NG MANUAL

I am the brain of the drone. I process data from sensors and make calculations to keep the drone stable.
Who am I?

Answer : Flight Controller

MISS*NG MANUAL

I am the skeleton of the drone. All the motors, the brain, and the battery strap onto me to keep everything holding together in one rigid piece.
Who am I?

MISS*NG MANUAL

I am the skeleton of the drone. All the motors, the brain, and the battery strap onto me to keep everything holding together in one rigid piece.
Who am I?

Answer : Drone Frame

MISS*NG MANUAL

I point you North, South, East, and West like a digital pocket compass so the drone never loses its orientation. Who am I?

- GPS Module
- Magnetometer
- Barometer
- Gyroscope

MISS*NG MANUAL

HOW ALL THE PARTS WORK TOGETHER

MISS*NG MANUAL

DRONE SAFETY & RESPONSIBILITY

Check the drone before flight.
Monitor the battery.

Follow local rules and fly under appropriate supervision.

Never touch spinning propellers.

MISS*NG MANUAL

THANK YOU

MISS*NG MANUAL
